massine-amakhtari-48b815261

Profile

Backend-focused software engineering student specializing in **distributed systems** and **cloud-native architecture**. Experience building **event-driven systems** with Spring Boot, Kafka, and containerized environments, with a focus on scalability, fault tolerance, and clean system design.

Key Projects

Pulsestream – Cloud-Native Event Platform | `GitHub`
Designed a **distributed event-driven platform** for real-time telemetry ingestion and processing using Spring Boot and Kafka. Focused on scalability, fault tolerance, and observability in a microservices architecture.

OrderFlow – Event-Driven Order Processing System | `GitHub`
Built an **event-driven backend system** using RabbitMQ and Spring Boot. Implemented Saga and Outbox patterns with retry mechanisms and idempotent consumers.

Azure AI Student Support Platform | `GitHub`
Built an AI-powered web platform using Next.js, TypeScript, and Microsoft Azure. Integrated OpenAI APIs to provide personalized assistance for multilingual students.

Technical Skills

Core: Distributed Systems, Event-Driven Architecture, Microservices

Languages: Java, SQL, JavaScript, Python

Backend: Spring Boot, REST API Design

Messaging: Apache Kafka, RabbitMQ

Databases: PostgreSQL, MongoDB

Cloud & DevOps: Docker, Kubernetes, GitHub Actions

Concepts: Saga Pattern, Outbox Pattern, Idempotency, Asynchronous Processing

Experience

MAMSI Consulting & Event
Software Engineering Intern *6 weeks*
Contributed to backend development and feature implementation. Translated business requirements into technical solutions and collaborated with stakeholders to deliver production-ready features.

Education

EMSI (École Marocaine des Sciences de l'Ingénieur) **Rabat, Morocco**
Engineering Degree in Software Development *2022–2027*
4th year of engineering cycle. Expected graduation: 2027

Certifications

ALX
ALX Software Engineering – Back-End Track *June 2024*
Backend development, API architecture, database systems, and DevOps fundamentals.

IBM (Coursera)
Python for Data Science, AI & Development *April 2025*
Python for data analysis, scientific computing, and AI fundamentals.

Languages & Interests

Arabic (Native), French (Fluent), English (Fluent), Spanish (Basic) | Distributed Systems, Backend Engineering, Cloud Architecture, Cybersecurity
